

2022 COLLECTION

CORUM
AVANT-GARDE SINCE 1955

2022

COLLECTION

Founded in 1955, Corum represents creative and daring watchmaking. Corum uses an approach free of dogmas that enables a reconceptualisation of movement construction, its casing, and the artistic crafts that brighten the dial. Behind the many technical achievements (baguette movement) and aesthetic achievements (Coin Watch, Feather, Bubble), Corum continues the tradition of high-quality watchmaking that is ahead of its time.

Corum, established in La Chaux-de-Fonds, is opening itself up to the contemporary, street art, and classical art worlds, and in doing so attracting the attention of various trendsetters. At once disruptive yet respectful of its watchmaking heritage, Corum maintains its status of a niche brand aimed at demanding collectors of unconventional timepieces.

Corum is currently based on five collections that embody its vision of 21st-century watchmaking: Admiral, Golden Bridge, Heritage, LAB and Bubble.

Admiral

Created in 1960, the Admiral collection draws its original inspiration from nautical sports, and its timepieces are now considered iconic sporty chic watches. Influenced by teak wood and jet set evenings, the Admiral goes from the deck to dinner without compromising its contemporary elegance. Over 60 years, the piece has established itself as a creation for aesthetes seeking tasteful casualness, in between work and leisure, city and nature. Independent, creative, audacious, it is undeniably a Corum creation.

The collection combines the aspirations of the modern gentleman with the early Admiral 42 line featuring a classic sport design, and the robust and sophisticated Admiral 45 line which was designed for extreme sports enthusiasts.

Golden Bridge

Launched by Corum in 1980, The Golden Bridge model remains a unique construction in watchmaking, an original creation where the linear movement forms both the calibre and most of the piece's dial. Sculptural, technical, and of rare aesthetic audacity, the baguette movement of the Golden Bridge is unrivaled in the world of Fine Watchmaking.

In celebration of the 10th anniversary of the Automatic Golden Bridge, Corum takes another leap, unveiling a new Automatic Golden Bridge series with an avant-garde case that delivers sweeping views of the meticulously finished movement.

Heritage

The Heritage Collection pays tribute to traditional watchmaking reinterpreted by Corum. For more than half a century, Corum has greatly enriched the technical and aesthetic language of the rather conservative realm of watchmaking. The “Heritage” title of this collection is a way for Corum to demonstrate the importance of its roots but at the same time going beyond its history and renewing it.

The Coin Watch, the dial and movement of which are encased within a coin, is itself the most timeless illustration of the boldness it has held within for almost forty years.

LAB

Staying true to its founding philosophy of always being Avant-Garde in order to preserve its future, Corum developed the LAB series to showcase its unprecedented foray into distinctive and fearless watchmaking. The LAB 02 is the second laboratory watch to make its debut, with LAB 01 released in early 2019.

This new pillar of the Corum family pays tribute to the brand's founders who were always risk-takers and nonconformists. The entire premise of the LAB series is to break the mold by thinking outside of the proverbial box. LAB 02 certainly delivers.
