COLLECTION

Founded in 1955, Corum represents creative and daring watchmaking. Corum uses an approach free of dogmas that enables a reconceptualisation of movement construction, its casing, and the artistic crafts that brighten the dial. Behind the many technical achievements (baguette movement) and aesthetic achievements (Coin Watch, Feather, Bubble), Corum continues the tradition of high-quality watchmaking that is ahead of its time.

Corum, established in La Chaux-de-Fonds, is opening itself up to the contemporary, street art, and classical art worlds, and in doing so attracting the attention of various trendsetters. At once disruptive yet respectful of its watchmaking heritage, Corum maintains its status of a niche brand aimed at demanding collectors of unconventional timepieces.

Corum is currently based on five collections that embody its vision of 21st-century watchmaking: Admiral, Golden Bridge, Heritage, LAB and Bubble.

Admiral

Created in 1960, the Admiral collection draws its original inspiration from nautical sports, and its timepieces are now considered iconic sporty-yet-elegant watches. Influenced by a yacht's sleek lines and jet-set evenings, the Admiral goes from the deck to dinner without compromising its contemporary elegance. For over 60 years, these timepieces have embraced a lifestyle attitude, perfect for today's navigators and sailors, as well as for those who simply love the sea. Independent, creative, and audacious, they are undeniably Corum creations.

The collection combines the aspirations of the modern watch enthusiast with function and elegance in the Admiral 38 and 42 lines, which feature a classic sports design, while the robust and sophisticated Admiral 45 line was designed with technical prowess for extreme sports enthusiasts.

Golden Bridge

Launched by Corum in 1980, the construction of the Golden Bridge model remains unique in watchmaking, an original creation where the linear movement forms both the calibre and most of the piece's dial. Sculptural, technical, and of rare aesthetic audacity, the baguette movement of the Golden Bridge is unrivaled in the world of Fine Watchmaking.

In celebration of the 10th anniversary of the Automatic Golden Bridge, Corum takes another leap, unveiling a new Automatic Golden Bridge series with an avant-garde case that delivers sweeping views of the meticulously finished movement.

Heritage

The Heritage Collection pays tribute to traditional watchmaking reinterpreted by Corum. For more than half a century, Corum has greatly enriched the technical and aesthetic language of the rather conservative realm of watchmaking. The “Heritage” title of this collection is a way for Corum to demonstrate the importance of its roots but at the same time going beyond its history and renewing it.

The Coin Watch, the dial and movement of which are encased within a coin, is itself the most timeless illustration of the boldness it has held within for almost forty years.

LAB

Staying true to its founding philosophy of always being Avant-Garde in order to preserve its future, Corum developed the LAB series to showcase its unprecedented foray into distinctive and fearless watchmaking. The LAB 02 is the second laboratory watch to make its debut, with LAB 01 released in early 2019.

This new pillar of the Corum family pays tribute to the brand's founders who were always risk-takers and nonconformists. The entire premise of the LAB series is to break the mold by thinking outside of the proverbial box. The LAB 02 certainly delivers.

Concept

From Corum's iconic models such as Coin Watch to Bubble, Admiral or Golden Bridge collections, the brand has always taken risks and demonstrated a unique flair for design. With the Concept Watch, the brand intends to perpetuate this philosophy with a distinctively shaped watch housing a skeletonized tourbillon movement.

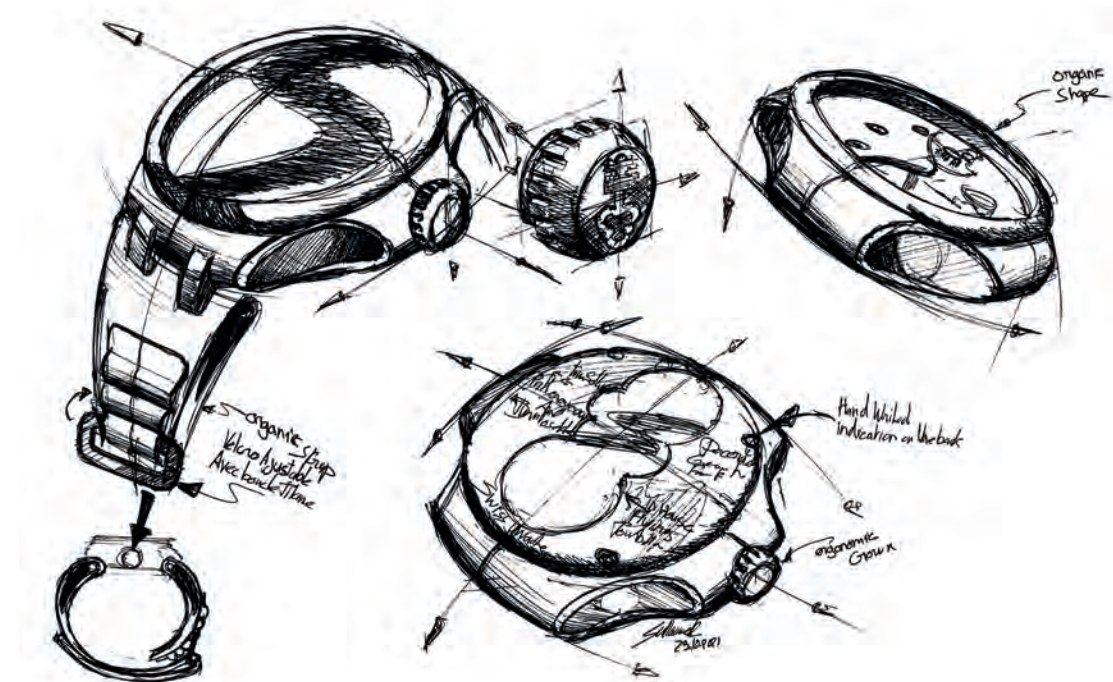

This all-new Concept Watch showcases a perfect fusion of organic shapes and sustainable materials. The watch case, inspired by round, organic forms, is meticulously crafted from recycled titanium grade 5. This not only demonstrates CORUM's commitment to environmental stewardship but also adds a unique touch to the timepiece's aesthetics.

At the heart of this exceptional timepiece lies a mesmerizing flying tourbillon movement beating at 3 Hz (21,600 vph) with a power reserve of 90 hours. Every component of the movement has been carefully crafted and appears to float within the sapphire plates, creating a visually stunning effect that captures the essence of elegance and craftsmanship. The dial, located beneath the movement, crafted from aventurine stone, evokes the captivating imagery of a meteor shower, adding a touch of celestial beauty to the Concept Watch.

CORUM's commitment to pushing the boundaries of design extends to the caseback as well. The expert design team in La Chaux-de-Fonds has created an intricately etched design surrounding the uniquely shaped opening. The window highlights the tourbillon, mainspring, and gear train, while the engraving vividly explains the main functionalities of the watch's components. This artistic representation showcases CORUM's dedication to blending form and function seamlessly.

Notably, the bracelet of the Concept Watch is a testament to CORUM's innovative spirit. Crafted from a unique and recycled textile material, it offers unparalleled comfort and durability. Additionally, the brand new adjustment system ensures a perfect fit for every wrist, showcasing CORUM's commitment to inclusivity.

The Concept Watch, presented in a 39.5 mm case, transcends the confines of traditional gender labeling, proudly embracing a universal appeal. This highlights CORUM's dedication to challenging conventions and embracing a more inclusive future.

As CORUM continues its journey of redefining luxury timepieces, the Concept Watch serves as a testament to the brand's unwavering commitment to innovation and excellence. By merging cutting-edge technology, striking design, and sustainability, CORUM reaffirms its position as a pioneer in the watch industry.
